Office Action Summary

Art Unit: 1712

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Pye (3711405).

Pye teaches a low fluid loss composition comprising water and a water-insoluble, oil-soluble crystalline wax (column 4, lines 49-60) which forms a deposit on the formation surface and is dissolved by production of the hydrocarbons. Such waxes would be within the weight range of the present invention. A polymer is mixed with the wax which would encapsulate wax crystals. The present invention is thus anticipated by Pye.

3. Claims 1-4, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gallus (3711405).

Gallus teaches a low fluid loss composition comprising water and a water-insoluble, oil-soluble crystalline wax (column 4, lines 9-20) which forms a deposit on the formation surface and

is dissolved by production of the hydrocarbons. Such waxes would be within the weight range of the present invention. A polymer is mixed with the wax which would encapsulate wax crystals.

The present invention is thus anticipated by Gallus.

4. Claims 1-3 and 5- 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Dill (3724549).

Dill teaches a composition comprising an aqueous carrier and a water insoluble, oil soluble hydrocarbon such as a dicyclopentadiene (terpene) resin, which is used to plug the well formation, and is removed by the production of the well. Dill also teaches the use of other compositions comprising compounds such as naphthalene and wax (see examples). The present invention is thus anticipated by Dill.

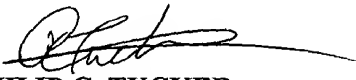

5. Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hower (2803306).

Hower teaches a composition comprising water and a water-insoluble, oil-soluble crystalline compound such as naphthalene, anthracene or beta-naphthol (column , line 62 - column 4, line 3) which forms a deposit on the formation surface and is dissolved by production of the hydrocarbons. Such compounds would be within the weight range of the present invention. The present invention is thus anticipated by Hower.
